## BUILDING BASICS

"Hi! I'm your K'NEX Building Buddy. Need help... I'm here! Look for me to guide you as you select models with the right level of building challenge."

### Gears

To engage the Gear, push the tan Lock into the hole on the Gear. Note the position of the Gear and the direction of the teeth. Make sure the teeth on the Gears mesh together.

### Ready, Set, Build

To begin your model, find the **1** and follow the numbers. Each piece has its own shape and color. Just look at the pictures, find the pieces in your set that match and then connect them together. Try to face your model in the same direction as the instructions while you build.

### Moving On

Faded colors show you this section is already built. You'll want to connect the new section to the place where the arrows are pointing. The new pieces you add and the place where they connect will be in full color.

### Angle Connector

Push the small orange Angle Connectors in the holes of other Connectors as you see in the picture.

### Flexi-rods

A Flexi-rod is a Rod that you can bend to make curves. It will be easier to attach to your model if you bend it back and forth first.

## Connectors

There are blue and silver Connectors with special long slots. They slide together as you see in the pictures. Push these parts together until you hear a "click."

## Flexi-tubes

To use the Flexi-tubes you will need to attach one of these purple Rod adapters to each end of the Flexi-tube.

# House and Garden

FRIENDLY CHALLENGE

## Spacers

There are places in your model where you need to add blue and silver Spacers. Be sure to use the right color and count them carefully.

## Grundlegende Bauanleitungen für K'NEX

"Hallo, ich bin dein K'NEX-Bauhelfer. Also aufgepasst, wenn ich in den Anleitungen aufkreuze! Denn dann heisst es, dass alle Anweisungen genauestens zu befolgen sind."

### Auf die Plätze, fertig, los! Das Bauen beginnt

Um mit dem Bauen deines Modells zu beginnen, suche die Nummer 1 und folge den laufenden Nummern. Jedes Teil hat seine eigene Form und Farbe. Schau dir einfach die Abbildungen an, such die Teile in deinem Bausatz, die so aussehen wie das, was du auf der Abbildung siehst und steck sie ineinander.

### Und weiter geht's

Blasse Farben weisen darauf hin, dass dieser Streckenabschnitt bereits zusammengebaut ist. Der neue Streckenabschnitt wird dort befestigt, worauf die Pfeile deuten. Die neuen Teile, die du anbaust, sind knallbunt angezeigt.

### Steckanschlüsse

Blaue und silberfarbene Steckanschlüsse haben besonders lange Schlitze. Wie du auf der Abbildung sehen kannst, lassen sie sich ineinander schieben. Achte beim Aneinanderfügen dieser Teile darauf, dass du ein Klickgeräusch hörst. Erst dann sind die Teile fest miteinander verbunden.

### Flexible Röhren

Zur Verwendung der flexiblen Röhren muss in purpurn einen der hellblauen Stabadapter gesteckt werden.

### Getriebe

Um die Zahnräder miteinander zu verbinden, einfach den beigefarbenen Bolzen in das Loch des Getriebes schieben. Achte auf die Lage der Zahnräder, dass sie ineinander greifen.

### Flexi-Laschen

Eine Flexi-Lasche ist eine Lasche, die du zu einer Kurve zurechtbiegen kannst. Sie lassen sich leichter an dein Modell anschließen, wenn du sie mehrmals hin- und herbiegst, um sie flexibler zu machen, bevor du sie das erste Mal benutzt.

### Eckverbindungsstück

Drücke die kleinen orangefarbenen Eckverbindungsstücke durch die Löcher der anderen Verbindungsstücke (siehe Abbildung)

## Abstand Halten

#### Oplysninger om batterier:

##### Forsigtig: Sådan undgås det, at batterierne lækker

- Sørg for at sætte batterierne rigtigt i og for altid at følge brugsanvisningen fra legetøjs- og batteriproducenten.
- Lad være at blande gamle og nye batterier sammen, eller at blande alkaliske, almindelige (kulstof-zink) eller genopladelige (nikkel-kadmium) batterier med hinanden. Det er kun tilladt at bruge batterier af samme eller tilsvarende type iflg. anbefaling.
- Tag altid svage elle udbrændte batterier ud af produktet, og pas på ikke at kortslutte polerne.
- Sæt batterierne i, så polariteten (+/-) er korrekt iflg.illustrationen.

#### Vigtige råd

- Det anbefales at bruge 2 (LR6) alkaliske batterier.
- Batterier, der kan genoplades, frarådes.
- Tag genopladelige batterier ud af legetøjet, inden de oplades; de må kun oplades under opsyn af en voksen.
- Batterier, som ikke er genopladelige, må ikke genoplades.
- Stav delene godt af. Lad være at nedsænke dem i vand.
- Batterier må ikke afskaffes ved at brænde dem; de risikerer at lække eller eksplodere, hvorved folk kan komme til skade.
- Tag alle batterier ud, hvis ingen skal lege med legetøjet i en længere periode.
- Indlad at stikke stænger mindre end 5,08 cm ind i nogen som helst åbninger i motoren; de vil beskadige motoren, og de kan ikke fjernes.

#### Sådan sættes der batterier i, og sådan tages de ud

- Brug en lille stjerneskruetrækker til at løsne skruen. Sæt 2 friske AA-batterier (eller LR6) i batterirummet, sørg for korrekt polaritet (+/-) iflg. illustrationen.

### (Side 4-5)

#### Parat, på mærkerne, byg

Find nummer 1 og følg numrene. Hvert stykke har sin egen form og farve. Se på billedet, match stykkerne til hinanden og snap dem sammen.

#### Så fortsætter vi

De falmede farver betyder, at dette afsnit allerede er bygget. Sæt det nye afsnit sammen på det sted, som pilene peger mod. Disse dele vil være i klare farver.

#### Samlestykker

Der er blå og sølvfarvede samlestykker med særlige lange slidser, som skydes sammen. Skub delene sammen, indtil du hører et "klik".

#### Fleksi-slanger

Når du vil bruge fleksi-slanger, skal du sætte en af de purper overgangsstænger fast i hver ende af Fleksi-slangen.

#### Gear

Gearene tilkobles ved at skubbe den lysebrune lås ind i hullerne. Bemærk gearets stilling og tændernes retning. Sørg for at gearene griber ind i hinanden.

#### Fleksi-stænger

En fleksi-stang er en stang, som du bøjer til at lave buer. Det bliver lettere, hvis stangen bøjes frem og tilbage først.

#### Vinkelsamlestykke

Skub de små orange vinkelsamlestykker ind i hullerne på de andre samlestykker, som du ser på billedet.

#### Afstandsstykker

Der er steder i modellen, hvor du får brug for at tilføje afstandsstykker. Sørg for at bruge de rette stykker og tæl den omhyggeligt.
